EXPERTISE

- Frontend: HTML, CSS, JavaScript
- Backend: Java
- Database: MySql
- Languages : Java, Javascript, c
- Others : Git & GitHub

LANGUAGE

- Hindi
- Engilsh
- Marwadi

PROFILE

A passionate and dedicated java developer with a strong foundation in object-oriented programming (OOP) principles. With a keen eye for detail and a passion for building scalable, efficient, and reliable software systems, I've honed my skills in Java, and Hibernate to deliver high-quality solutions.

PROJECTS

Library Management System

- Designed and developed a Simple Banking System using Java and the power of MySql as the database. This Banking systems manage the flow of money between individuals and businesses by accepting deposits and lending out money for investments. Banks earn interest from loans, the cost of managing consumer accounts, and investing for profits

Hotel Management System

- A Hotel Management System helps manage hotel tasks like booking rooms, checking in guests, billing, and housekeeping. It keeps track of room availability, staff schedules, and supplies. The system also generates reports to improve hotel operations and integrates with other tools for smooth management.

Number Guessing Game

- Designed and developed a game in this choose a random number between 1 and 100, then challenge the player to guess the number in 10 turns. After each turn the player should be told if they are right or wrong, and if they are wrong, whether the guess was too low or too high. It should also tell the player what numbers they previously guessed.
